

Patch Management That Just Works

with real-time discovery and remediation of third-party and OS vulnerabilities

Action1 reinvents patch management with an infinitely scalable and highly secure platform. Set up in 5 minutes to ensure continuous patch compliance while lowering costs. **First 100 endpoints are free forever:** test as long as you want in your enterprise or use perpetually in your small business.

Third-Party and OS Patching

Automate the entire patching process for remote and onsite endpoints, from identifying and deploying missing updates to compliance reporting.

Vulnerability Discovery and Remediation

Prevent security breaches and ransomware attacks. Detect vulnerabilities in OS and applications in real-time, and enforce remediation.

Secure and Trusted: SOC 2 and ISO 27001

Action1 is the first vendor focusing on patch management certified for SOC 2 Type II, ISO/IEC 27001:2022, and TX-RAMP.

Just knowing how prevalent ransomware is now and understanding that we've mitigated this risk by properly patching our third-party applications through Action1 is a huge relief for us.

Johnathan Kim,
Director of Technology at the Woodland Hills School District

Patching That Just Works

Why Action1?

Third-Party Patching

Automate patching of numerous software and OS titles with real-time progress status, even if your endpoints are offline.

Software Repository

Private software repository maintained by in-house security team. Includes 99% patching coverage for most enterprise environments.

Enterprise Integrations

Integrate Action1 with Active Directory, Entra ID, Okta, Duo, and Google. More integrations are available via REST API or PowerShell scripting.

Vulnerability Remediation

Identify all vulnerable software and OS installed on endpoints in real-time. Leverage built-in vulnerability remediation in a single solution.

P2P Distribution

Minimize external bandwidth usage and ensure rapid deployment of large updates without any on-prem cache servers.

Real-Time Visibility

Instant visibility into endpoint vulnerabilities, without the need for periodic scans. Live dashboard for monitoring SLA-based patch compliance.

Enterprise Scalability

Cloud-native platform: go from hundreds to hundreds of thousands endpoints at a gradually lowering per endpoint cost. No VPN needed.

5-Minute Setup

Start patching your endpoints in under 5 minutes and rapidly scale to as many endpoints as needed. No dependency on legacy tools, clunky integrations and feature overload.

Data Storage Locations

Action1 has data centers located in the USA and Europe, with a new one in Australia coming soon.

All-Inclusive Pricing

Get your first 100 endpoints for free. Scale up at a simple, transparent and all-inclusive rate. No hidden fees or nickel-and-diming for additional features (e.g. SSO).
